

Turbo-Charge Your Transformation Mapping

An Ideal Solution for High-Volume or Hands-Off Mapping Needs

If you have a high volume of Maps to create or simply want to outsource the mapping process, then Rapid Mapping Service is the ideal solution for you.

With Rapid Mapping Service, mapping is simple and easy to do. Pervasive Professional Services provides a logical mapping template along with instructions on how to complete the template. Once the template is filled in, Pervasive Professional Services creates a Map based on your specifications.

That's all there is to it. Mapping is highly automated because Pervasive software transforms the specifications from the template directly into a Map.XML file. The result is a fast, easy, and cost-effective way to handle all your mapping needs, regardless of size or complexity.

Mapping Your Benefits With Pervasive

With Rapid Mapping Service and your Pervasive software solution, you can:

- **Minimize your mapping costs.** Using Pervasive software and Pervasive Professional Services support, you can dramatically reduce both the immediate and long-term costs of mapping.
- **Shorten project lead times and increase speed to value.** Rapid Mapping Service can accelerate and streamline one of the more labor-intensive parts of the integration process.
- **Enhance reusability of code.** The XML-based architecture of Pervasive integration software greatly enhances Mapping code reuse in medium or large-scale environments.
- **Leverage Pervasive experience and expertise.** Pervasive professionals have helped over 35,000 customers around the world. We bring to the table a wealth of in-depth product knowledge and proven methodologies that can help optimize your integration projects at every level.

Rapid Mapping Service Deliverables

- A user-friendly "Logical Mapping Design Template" and Instructions
- Creation of a support call, if needed
- Completed design of Map or Process (if multiple Maps), to be executed by the customer
- Support call to hand-off and deliver quick knowledge transfer (debriefing)
- Batch file or VB front-end utility to execute
- Engine and temporary engine license file to execute

Customer Essentials

Although not necessary, it is very useful if the customer provides a high-level diagram or specification document of the environment in which the Maps will be executed or the data will be used. This enables Pervasive Professional Services consultants to gain insight into the business needs of the customer and be in a better position to make recommendations. In addition, the following is required:

- A flow-diagram of current process
- A completed "Logical Mapping Design Template"
- Source data or representative samples
- A contact person who will complete the Mapping template

Note: Although not a requirement, the transformed data would be beneficial.

The Best Support You'll Find for Pervasive Solutions

Of course, nobody knows more about Pervasive solutions than we do. Pervasive Professional Services works closely with Pervasive developers and technicians to ensure that our service offerings reflect the very latest advances in Pervasive technology and methods.

With over 20 years experience in developing Pervasive technology for data integration and infrastructures, we will always be your best choice for integration solutions, regardless of project size or type.

Part of a Comprehensive Range of Services

Pervasive services include our worldclass PRIME™ Methodology for rapid implementation, 24/7 online support, training programs, application integration, post-production support, and ongoing consultation.

Whatever your needs, we can work with you to develop flexible, efficient, and cost-effective solutions. And with package pricing for many services, you'll recognize reduced costs as you continue to enhance your Pervasive solutions.

Take Costs Out of Integration

Talk to us today. We'll be glad to tell you how Pervasive solutions can take costs out of integration and accelerate your speed to value.
